PROFILE

As a passionate and detail-oriented aspiring backend developer, I am committed to building robust, efficient, and scalable server-side applications. Currently pursuing a Bachelor of Science in Information Technology, I have gained a solid understanding of backend technologies, including Python, Java, SQL, and various database management systems. In addition to my studies, I have worked as a freelance Computer Technician, identifying and resolving technical issues, and maintaining computer systems for various clients. This experience has honed my problem-solving skills and client-oriented approach. I am eager to leverage my technical expertise and innovative mindset in a collaborative environment. My goal is to contribute to the development of high-performing applications that enhance user experiences and drive business growth.
