Article/Journal Title: Open research data, an archival challenge?

Web Page Title: Open research data, an archival challenge?

Author and Date: Charlotte Borgerud & Erik Borglund (2020)

URL: <https://link.springer.com/article/10.1007/s10502-020-09330-3>

Summary:

The Swedish government has decided that all research results in the form of research data and scientific publications financed with public funds should be openly accessible as far as possible. The question is whether the responsible actors and if the universities are ready to implement the change. The significance of open access has amplified in Sweden. Earlier research has brought to light that the collection and preservation of research data are often surrounded by ambiguous rules and lack a comprehensive structure. For example, archiving is not given enough consideration in connection to research projects and researchers often tend to save their material on platforms that are not persistent over time. This article is based upon a qualitative research approach where 15 semi-structured interviews have been used as primarily data sources to investigate the implementation of open access of research data and scientific publications. The article investigated how Swedish universities and public authorities were working with archiving and implementation of open research data and their opinions on open access. The results displayed a lack of coordination, resources and infrastructure but also that common agreed nomenclature were missing. The management of research data was not part of an overall

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

recordkeeping strategy. One explanation could be differences in the information culture among researchers and archivists. Social sciences theory has been combined with archival theory in order to explain the reasons to this. These have been put in relation to the principles of the open data directive.

Article/Journal Title: Advantages and Limitations of Archival Research

Web Page Title: Advantages and Limitations of Archival Research

Author and Date: Algorhythms (N.D.)

URL: <https://slimkm.com/blog/advantages-and-limitations-of-archival-research/>

Summary: Many times researchers rely on secondary data to get the information they may not have the time to collect primary data, face challenges in finding the right sample size, or lack the resources to conduct such research. This is where they often prefer Archival Research for systematic investigation of records and documents in order to discover and preserve information. What is Archival Research? Archival Research is the process of researching records that are created and stored by institutions, organisations, and individuals. The records may be in any format, from paper to audio or video recordings. The records may be created for different purposes, such as the administration of a company or a university. The person who conducts archival research is called an archivist. They work in archives which are in libraries, museums, universities and other institutions with collections of documents usually managed with the help of Archival Management Software.

Web Page Title: A worldwide quantitative review of the iSchools' archival education

Author and Date: King Kwan Li & Dickson K.W. Chiu (2022)

URL: <https://www.emerald.com/insight/content/doi/10.1108/LHT-09-2021-0311/full/html>

Summary: Archival studies have long been a critical part of information education around the world. This paper attempts to provide a worldwide overview of archival education among main information schools worldwide and find out their similarity and differences to suggest measures for the development of archival education.

Article/Journal Title: What is Archival Research?

Web Page Title: What is Archival Research?

Author and Date: Lexis Nexis (N.D.)

URL: <https://internationalsales.lexisnexis.com/glossary/research/archival-research>

Summary: What is Archival Research? Archival research is research that involves searching for and extracting information and evidence from original archives. Archives are historical – non-current – documents, records, and other sources relating to the activities and claims of

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

individuals, entities, or both. They exist both to preserve historic material of value and to make it available for future use.

Article/Journal Title: What Is Archival Research?

Web Page Title: Archival Research: Why Archival Research?

Author and Date: Georgia State University (N.D.)

URL: <https://research.library.gsu.edu/archivalresearch>

Summary: Archival research is research involving primary sources held in an archives, a Special Collections library, or other repository. Archival sources can be manuscripts, documents, records (including electronic records), objects, sound and audiovisual materials, or other materials.

Article/Journal Title: Digital Libraries

Web Page Title: Handbook on Information Technologies for Education and Training pp623–641

Author and Date: Edward A. Fox, Marcos A. Gonçalves & Neill A. Kipp (N.D.)

URL: https://link.springer.com/chapter/10.1007/978-3-662-07682-8_39

Summary :In the 21st century, digital libraries will have a tremendous positive impact on education, as sharing of learning resources increases, supporting not only distance education but

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

also on-campus and independent discovery-based learning. High-quality resources of all types will be contributed by diverse sets of authors directly into digital libraries, including through open archives, leading to a vast increase in use of rich multimedia works. Two case studies, in the discipline of computing, and across institutions interested in electronic theses and dissertations, illustrate the 5S framework (facilitating understanding through use of the abstractions of societies, scenarios, spaces, structures, and streams) and other key concepts. So too does the exciting seed project of the US National Science Foundation to lead development of a National Science, Mathematics, Engineering, and Technology Digital Library (NSDL). While extensive research aims to solve the myriad problems to be faced, and evaluation studies have not definitively demonstrated expected benefits, preliminary findings on increased access and expanded utilization of more interactive materials demonstrate great promise.

Author and Date: Suffolk University (N.D.)

URL: <https://suffolk.libguides.com/c.php?g=654227&p=4590597>

Summary: Archives contain one-of-a-kind materials such as diaries, letters, and photos that are preserved because these materials have long-term value for research. Archives exist to collect, preserve, and provide access to their research collections in perpetuity.

Article/Journal Title: What is Archiving: Why is it Important?

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

Web Page Title: What is Archiving: Why is it Important?

Author and Date: HAISAM ABDEL MALAK (2023)

URL: <https://theecmconsultant.com/what-is-archiving/>

Summary: Archiving should be regarded as a critical component of any company and should be incorporated into every organization's records management strategy. Archives are live historical documents. They are valuable to companies because they provide documentation, explanation, and justification for both past and current actions. The reason why archives are important is that archiving benefits are enormous and play an important role in an organization's success.

The reason why archives are important is that archiving benefits are enormous and play an important role in an organization's success.

Article/Journal Title: The Ethics of Playing, Researching, and Teaching Games in the Writing Classroom pp 273–293

Web Page Title: So, You Want to Start a Research Archive?: Ethical Issues Researching and Archiving Video Game History

Author and Date: Mary C. Karcher (2021)

URL: https://link.springer.com/chapter/10.1007/978-3-030-63311-0_16

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

Summary: This chapter explores the ethos surrounding video game history preservation: the ethical concerns of creating a research and history archives. The ethos behind the choices made during preservation can have a significant impact on what is preserved. Many ethical challenges are centered on copyright laws, which are dependent upon different groups' core values—for instance, production companies and their market economy versus fans and their gift economy. Drawing on information science scholarship, this chapter explores participatory archives which shift the focus away from the archival objects and instead emphasizes the users and contributors to the archive. The resulting archive is a collaborative, cooperative endeavor, one that respects and embraces the ethos of all who participate.

Web Page Title: Article/Journal Title:Web Page Title:Author and Date:URL:Summary:

Author and Date: Abdul Shareef Pallivalappil & Jagadeesha S. N.(2022)

URL: <https://srinivaspublication.com/journal/index.php/ijcsbe/article/view/1504/675>

Summary: As information is gained and a progressive society is developed, research articles are never intended to be confined to a certain group of people. Instead, they are intended to facilitate further research in every field of study, therefore benefiting everyone. However, owing to financial and resource constraints imposed by the publishers, research articles that are no longer available after a few years after publication provide a significant challenge to the field. Additionally, the lack of skilled reviewers from specialised fields who do not get any recognition

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

for their review efforts is expanding and posing a problem to the review process as a whole. Consequently, it is urgently necessary to establish a system to solve this problem and fill all loopholes, so that research effort may be given top priority in the future. Using peer-to-peer (P2P) technology, this study suggested the development of system known as the Open Platform for Research Article Sharing (OPRAS) that would solve these difficulties.

FOREIGN STUDY

Article/Journal Title: Research and Capstone Project Electronic Repository

Web Page Title: Research and Capstone Project Electronic Repository

Author and Date: Sarah Jean W. Lalisan, Noel Sobejana (2019)

URL: <https://typeset.io/papers/research-and-capstone-project-electronic-repository-57vcgbtsun>

Summary:

The website developed for the research and capstone project repository received positive evaluations from the fifty respondents, with high ratings for reliability, functionality, usability, and overall performance. However, there were some problems encountered, such as the website's capacity to perform properly on other gadgets. The system was found to be reliable, functional, and usable, with reliable output, consistent error handling capabilities, and completeness according to the objectives of the project. The lowest rating was given to reliability due to concerns about the storing capacity of the system and the completeness of the information stored in the database. The researcher fixed the encountered problems during testing. The performance of the website was described as very agreeable overall.

Article/Journal Title: Construction and Research of Digital Archives Cloud Platform Based on Big Data Management

Web Page Title: Construction and Research of Digital Archives Cloud Platform Based on Big Data Management

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

Author and Date: Yazhi Sun (2021)

URL: <https://ieeexplore.ieee.org/abstract/document/4221923>

Summary:

Since the research platform of this paper is a virtual cloud digital archives security assessment model, the expert scoring data in the fuzzy comprehensive evaluation stage has certain virtuality and randomness, so this paper does not summarize and discuss the security issues that need to be explored and analyzed after the evaluation results. In practical application, the archives staff should have the ability to effectively use the security assessment system, and report the results to the leadership of the archives and the leaders of the information technology department in a timely manner after conducting a comprehensive security assessment for each specific index, so as to discuss the solution to the problem. At the same time, listen to the opinions of technical experts from other archives, universities and related industries, summarize the opinions, and jointly determine the solutions to the security problems of cloud digital archives. Gather the strength of the people, so that the cloud digital archives is always in a good state of operation.

Article/Journal Title: Archives as Information Infrastructure and Their Urgency Towards Research

Web Page Title: Archives as Information Infrastructure and Their Urgency Towards Research

Author and Date: L Nurdin (2021)

URL:

<https://typeset.io/papers/archives-as-information-infrastructure-and-their-urgency-1u6gw291w2>

Summary:

Archives are considered as information infrastructure in research and are seen as the primary source for research. Archives serve as a means of historical preservation, providing primary documents that are born simultaneously with events, making them important for historical research. Archives are a valuable source for research development capital, as they have a high degree of accuracy and contribute to producing qualified research.

Article/Journal Title: INTERNATIONAL JOURNAL OF MULTIDISCIPLINARY RESEARCH AND ANALYSIS

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

Web Page Title: INTERNATIONAL JOURNAL OF MULTIDISCIPLINARY RESEARCH AND ANALYSIS

Author and Date: Alpasan B. G. B., Esimos M. J. V., Fernandez S. M. B., Maligang A. K. P., Pagayonan S. M. S., Zaragosa A. R. A. (2021)

URL: <https://ijmra.in/v4i12/Doc/24.pdf>

Summary:

The result of the developed system is 4.74 which is interpreted as Very Good. The finding implied that the degree in which the functions facilitate had accomplished the specified task and objectives of the developed system of the specified user in uploading and downloading the electronic archiving system of the Institute of Information and Computer Studies. The usability of the proposed features of e-document Archiving System with SMS Support has a computed mean of 4.67 which is interpreted as Very Good. The findings implied that the degree in using the SMS Support can be used by specified users to achieve specified goals with effectiveness and efficiency. The performance of the developed system in terms of time behavior have the computed mean of 4.64 and reliability have the computed mean of 4.73and interpreted as Very good. This simply implied that the degree in which the response and processing time in performing its functions, meet the desired and expected the requirements by the end users. It showed that the system are users friendly and fully functional. Based on the interpretation that was discussed in the preceding chapter, the following conclusions were arrived: The features of the e-Document Archiving System with SMS Support were very usable in terms of archiving of documents with decision-making. The features of the e-Document Archiving System with SMS Support were able to secure all school data and information and made them readily and quickly available for use by the executives which were bases for decision-making. The graphical user interfaces and the entire design of e-Document Archiving System with SMS Support were indeed user-friendly and adaptable for the executives. When the system was used, the menus and icons were very clear, understandable and easy to use for the end users. The findings implied that the degree in which using the features of e-Document Archiving System with SMS Support can be used by specified users to achieve specified goals with effectiveness, efficiency. Features were easy to operate and controlled, wherein reports generated by the system such as documents viewing, retrieved and printed in real-time by the Secretary. The findings implied that the degree in which the response and processing time and throughput rates of a product or system, when performing its functions, meet requirements using the developed e-Document Archiving System with SMS Support is very good. Provide director an easy way to view the submitted documents of every faculty anytime. From the findings and conclusions of the study, the following recommendations were strongly suggested: Since automation and computerization is adapted and used in most offices and schools, it maybe suggested that the eDocument Archiving System with

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

SMS Support be implemented and to be used by school of Institute of Information and Computer Studies to help the Director and faculty in managing and archiving reports and other important tasks. The Institution may conduct trainings to the intended users for the familiarization of the system especially during data entry of important inputs for the system to work.

Article/Journal Title: Data Sharing and Access

Web Page Title: Data Sharing and Access

Author and Date: Alan F. Karr (2016)

URL: <https://typeset.io/papers/data-sharing-and-access-10adjlboeg>

Summary:

Data sharing and access are important issues in the rapidly changing scientific landscape, driven by the increasing use of data in research, the complexity and volume of data, privacy concerns, and the need for reproducibility of research. The author emphasizes that data availability is a public good and can provide economic and scientific value to both data generators and consumers. Research data archives can play a crucial role in facilitating data sharing and access. The author argues that research data availability is inevitable and outlines a feasible and sensible path for achieving it, taking into account the complexity of the problem and the diverse incentives of stakeholders. The paper also mentions the use of technologies like secure multi-party computation (SMPC) for performing data analyses without directly sharing the data, which can be a viable alternative in certain situations.

Article/Journal Title: Archives as Information Infrastructure and Their Urgency Towards Research

Web Page Title: Archives as Information Infrastructure and Their Urgency Towards Research

Author and Date: L Nurdin (2021)

URL: <https://journal.uin-alauddin.ac.id/index.php/khizanah-al-hikmah/article/view/18367>

Summary :

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

This research was conducted to investigate archives as information infrastructure in research. This term is used because archives are seen as the primary source for research. Thus, it is very fundamental and urgent for researchers regarding the data to be used and their accuracy is reliable. The research used a qualitative descriptive method in the frame of a constructivist approach in reading the phenomena of UIN Sunan Kalijaga Archives. Data collection was carried out using three main techniques, namely interview, observation, and documentation. The results of the study found three important issues related to the existence of archives as information infrastructure on research, i.e. archives as a means of historical preservation, primary document, and research development capital. As a curator of history, it seems that its function is very important in historical research because its birth was not intended to produce historical materials, but was born by itself following the interaction of the people. As a primary document, archives are important because they were born simultaneously with events, not from the stories of social actors. As for the framework of research development capital, archives are a source that has a high degree of accuracy, so that its function in research is very important to produce qualified research.

Article/Journal Title: Web Page Title: On the Importance of a Research Data Archive

Author and Date: Wright B., Brunner O., Nebel B. (2018)

URL: <https://typeset.io/papers/on-the-importance-of-a-research-data-archive-1mtch725xn>

Summary:

Managing research data in a university setting is a major challenge due to the lack of a unified data management system and the distributed storage of data by individual researchers. High staff turnover in university departments can lead to loss of information and data, resulting in the repetition of data generation, which is costly and time-consuming. Publishers and funding agencies now require the storage, sharing, and reuse of research data. Digital preservation, such as the use of a research data archive, can help group leaders and their employees cope with these challenges by providing a centralized and secure storage solution for research data.

Article/Journal Title: The ePresence Interactive Webcasting and Archiving System: technology Overview and current research issues. Learning & Technology Library (LearnTechLib)

Web Page Title: The ePresence Interactive Webcasting and Archiving System: technology Overview and current research issues. Learning & Technology Library (LearnTechLib)

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

Author and date: Baecker R., Wolf P., Rankin K. (N. D.)

<https://www.learntechlib.org/p/11264/?fbclid=IwAR1hRCDOU0qa9CmSzj5gHeRP58AzLYxsLhsKKCsEUpmOYHIkZbaj0NEOxpo>

Summary:

In contrast to videoconferencing, webcasting supports scaleable Internet visual communications, yet it is typically viewed as an ephemeral one-way broadcast medium. We have developed a system design to support interactive webcasts that are accessible in real-time by remote viewers and retrospectively by archive viewers who can browse and search for what they want to see. ePresence is an open source system implemented using .NET technology that currently works with Windows and Linux servers and supports a wide variety of machines, operating systems, browsers, media engines, and bandwidths. We discuss current features of ePresence, its architecture and implementation, research intended to provide new capabilities, and the motivation for an open source release. Further details about the system's functionality, interface, and applications may be found in the companion paper "ePresence: An Open Source Interactive Webcasting and Archiving System for eLearning" by Rankin, Baecker, and Wolf.

Article/Journal Title: A Sharing Mind Map-oriented Approach to Enhance Collaborative Mobile Learning With Digital Archiving Systems

Web Page Title: A Sharing Mind Map-oriented Approach to Enhance Collaborative Mobile Learning With Digital Archiving Systems

Author and Date: Chang, J. H., Chiu, P., & Huang, Y. M. (2018)

URL: <https://www.irrodl.org/index.php/irrodl/article/view/3168>

Summary:

With the advances in mobile network technology, the use of portable devices and mobile networks for learning is not limited by time and space. Such use, in combination with appropriate learning strategies, can achieve a better effect. Despite the effectiveness of mobile learning, students' learning direction, progress, and achievement may differ. Thus, the enhancement of learners' opinions on the usability and interactivity during mobile learning are challenging issues to overcome. This study developed a sharing mind map-oriented mobile learning system integrated with valuable information preserved in a digital archiving system. In

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

addition to the functions of traditional mind maps, this system also enabled students to complete and record relevant information that they had found onto the mind map and further improve the integrity of their own knowledge. To investigate the effectiveness of this teaching approach, this study added digital archive data and used mind map sharing to help learners develop knowledge. By using the proposed approach, students were able to perform self-assessment on learning content, choose appropriate learning directions, and progress according to their level of learning. At the same time, they could collaboratively learn with peers to engage themselves more deeply in their learning. That is, their learning motivation could be constantly triggered through the observations and sharing of mind maps from one to another. This study selected sixth graders as its research subjects in two classes at the school where one researcher works. There were 31 and 30 valid samples in the experimental group and control group, respectively, with a total of 61 students. The experimental group was conducted by using sharing mind map with corresponding geographical archived information to investigate the effectiveness of sharing mind map (SMM) in mobile learning; on the other hand, the control group was conducted by using a traditional learning approach. The outcomes indicate that students' learning performance could be enhanced by using archived information SMM mobile learning.

Article/Journal Title: Development of Electronic Document Archive Management System (EDAMS): A Case Study of a University Registrar in the Philippines

Web Page Title: Development of Electronic Document Archive Management System (EDAMS): A Case Study of a University Registrar in the Philippines

Author and Date: Las Johansen B. Caluza (2017)

URL: <http://surl.li/mouuk>

Summary:

The traditional method of data storage has shown its impact in managing documents from security, retrieval, and monitoring. Many kinds of literature suggest that this approach would result in low job satisfaction rating from its clients. Leyte Normal University's Office of the Registrar is no escape in this dilemma. In November 2013, the university experienced the strongest typhoon ever recorded known as Haiyan locally known as Yolanda. The archive/storage area of the Registrar was heavily affected were most of the documents scattered and deteriorated. With this experience, it is empirical to study to provide a practical solution. The researcher utilized embedded single case study using thematic analysis in identifying the issues and coping strategies of the seven participants through in-depth interviews, focus group discussion, and observation. Moreover, the utilization of Systems Development Life Cycle's

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

Sashimi model in developing the software was carried out. The result revealed various issues and coping strategies mentioned by the participants, from a limited storage area to difficulty in document retrieval and monitoring, and from the utilization of logbook to misclassification of records. Finally, the results became the basis for developing the electronic document archive and management system (EDAMS).

LOCAL LITERATURE

Article/Journal Title: Digital Curation Projects: A Study of Selected Academic and Research Repositories in the Philippines.

Web Page Title: Digital Curation Projects: A Study of Selected Academic and Research Repositories in the Philippines.

Author and Date: Lourdes T. David, Stephen B. Alayon(2016)

URL:

https://bpb-us-e1.wpmucdn.com/blogs.ntu.edu.sg/dist/8/644/files/2016/11/LIBRESv26i1p89-98_DavidAlayon-18vskbe.pdf

Summary:

The study found that most of the digitalization projects were initiated by the librarians in cooperation with ICT personnel and funding agencies. The selection of the materials for digitization was based on demand, the condition of the print format, and importance of the materials for future use. The results indicate that digitization was practiced primarily for better access to content and preservation of the original print format. Conversion into microfilm from digital format, use of Internet mirror sites, and off-site repositories of data on hard disks were some of the preservation methods practiced by libraries. Different platforms were used by the different libraries for various reasons. Some are not OAI compliant. Challenges faced by digital curation activities include the need to develop the digital curation skills of information professionals and researchers, and to develop the information infrastructure of the institutions and the country. The study provides a profile of digitization initiatives in the Philippines. It has identified best practices and problems encountered in undertaking the projects, which can provide a basis for making decisions for future digitization projects of other libraries.

Summary:

In celebration of History Month this August, the National Historical Commission of the Philippines (NHCP) has launched an online archive containing thousands of materials about the country’s history. Called the National Memory Project, the archive launched on Tuesday, Aug. 1, contains “rare books, photos, documents, plans and ephemera” from NHCP’s libraries, archives and museums. Other institutions like the National Library of the Philippines also shared their “unique collections” to the archive, the NHCP said. “Alongside the concern for informed judgment, the NHCP believes that it is high time to intensify the campaign to democratize the historical resources of the country,” read the project brief. “It can empower Filipino society to obtain first-hand, authoritative historical materials. It can help capture the interest of the public in the richness of their shared, inherited past, as most of them may not have seen such materials before,” it added. The NHCP said the archive “envisions a democratized Philippine history for all.” Among its missions is to simplify historical research, increase public access to primary sources from contributors and empower them to be “more critical of their shared past.”

<https://www.semanticscholar.org/paper/Archiving-And-Digitizing-Of-Customer-Records-Of-Subia-Corpuz/7fd36670c2f9c69a8d2e43a32ea14fef45ad511f>

Summary:

The research subject and the related literature described were intended to provide an alternative arrangement for the recovery and reproduction of information contained in traditional print materials, such as bank records relating to loans, deposits, and customer information, which become fragile and unusable in a certain period, preserving such valuable information through digitization would result in increased accessibility, rapid recovery, and greater security. With the established principles and best practices of the RRL, the researcher was able to construct action plans that include Digitization Phase, Compliance Measures, and Engagement with Online Solutions Development, information flows are built from these plans and converted into an infrastructure that provides the overall process of digitization that play a significant role in developing and implementing the right system.

<https://news.abs-cbn.com/life/06/01/18/what-we-lost-in-the-fire-notes-on-our-archives-and-the-buildings-that-house-them>

Summary:

It was only in the first decade of the millennium that the building was renamed the Juan Luna E-Services Building. This christening came after Carlos Araneta purchased the building in 2009—he had meant to lease the building to emerging BPOs, but its now- seedy and gritty location proved unappealing to investors. Building lessor Christopher Hagedorn was able to find some lessees, however, among them the National Archives. But fire found the building on the morning of May 28 as it spread from the BPI Plaza Cervantes Building, to the Land Management Bureau, and then on to the Juan Luna Building. All three can be found on the same block, bound by Juan Luna St., Muelle Dela Industria, Plaza Moraga, and Plaza Cervantes. While our ties to our history—and our buildings—are literally burning, one wonders if a larger metaphor can apply to our country. Perhaps we’re figuratively burning down a grand old house that’s fallen on hard times.

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

Summary:

In a forum on Saturday on book censorship and academic freedom, UP Diliman Chancellor Fidel Nemenzo vowed to protect the university's collection and defend the campus as a sanctuary of free ideas and activism. UP Diliman, whose history is steeped in student activism, is home to books and research materials that could be tagged by the military as subversive, said Eimee Rhea Lagrama, the deputy university librarian. This includes a special collection on the Marcos dictatorship consisting of brochures, flyers, manifestos and clippings on that era that were donated to the library. UP's collection also features the "Selda Papers," named after the Marcos-era activist group Samahan ng Ex-Detainees Laban sa Detensyon at Aresto (Selda). That section includes police reports, eyewitness reports, and other legal documents on human rights violations during the dictatorship.

Summary:

In 2017, militants partially destroyed a Roman amphitheater in the ancient Syrian city of Palmyra. UNESCO condemned the action as a war crime and an "immense loss for the Syrian people and for humanity." That same year, Islamic State fighters smashed pre-Islamic artifacts in the Mosul Museum in northern Iraq. The loss in the Philippines was more subtle, but still profound. Even before the militants stormed into Marawi, strict Islamic scholars and followers — usually educated in Saudi Arabia — scorned folkloric practices and even encouraged the destruction of the ancient Maranao texts. "Siege or no siege, the collections — whatever scraps are left of them — [are] rapidly going away," said Nasser Sharief, a manuscript collector and project consultant for Grupo Kalinangan. A ruined filing cabinet sits in rubble in the area hit hardest by the siege of Marawi. (Hannah Reyes Morales for The Washington Post. Many of the manuscripts have yet to be translated. According to UNESCO, the "Darangen" is composed of 17 cycles and 72,000 lines, with a narrative that covers love, death and politics. Performers of the epic, who typically chant and dance, are few.

Summary:

“This bill aims to address this problem by creating NFAP (National Film Archive of the Philippines), which will ensure the protection and preservation of Filipino films that are part of our historical and cultural heritage,” Estrada said Sunday in a statement. Passed into law in 2002, Republic Act 9167 mandates the Film Development Council of the Philippines (FDCP) to create a film archive, but Estrada said the agency has yet to establish a permanent and sufficient space and allot proper equipment for film preservation. Citing data from the FDCP, Estrada said 65% of the country’s cinematic heritage was either lost or destroyed. “It is estimated that out of more than 8,000 movies shot on film, only around 2,000 have surviving copies,” he added. During the hearing, the upper chamber will also review Senate Bills 1032 and 2250. SB 1032, or the World-Class Filmmakers’ Incentives Act, aims to promote local films and support their production through incentives and tax exemptions.

LOCAL STUDY

Article/Journal Title: Digital curation projects: A study of selected academic and research repositories in the Philippines

Web Page Title: Digital curation projects: A study of selected academic and research repositories in the Philippines

Author and Date: Lourdes T. David, Stephen B. Alayon (2016)

URL:

<https://typeset.io/papers/digital-curation-projects-a-study-of-selected-academic-and-41s3mf0wlt>

Summary:

The digitization project at the Rizal Library of the Ateneo de Manila University was successful in addressing the challenges faced with maintaining the quality of microfilms and providing easy access to newspapers and photographs.

The survey conducted among microfilm users and potential DVD users revealed a preference for acquiring newspapers in digital format.

A pilot study was conducted using four newspapers, and the feedback from users was used to improve the product, including the addition of an index for fast retrieval.

The survey conducted after a year showed that users were very satisfied with the product, and the production of newspapers on DVD became a regular function of the library's photoduplication section.

PAMANTASAN NG LUNGSOD NG VALENZUELA

URL: <https://digitalcommons.unl.edu/cgi/viewcontent.cgi?article=9104&context=libphilprac>

Summary:

Records in the university archives are important sources of information for researchers and other stakeholders because these are created to preserve and conserve the institutional memory and the local cultural heritage. The study used the qualitative method of research to determine the status of the University Archives of Saint Mary's University (Philippines) in terms of: 1) scope, interpretation, and objectives; 2) functions of the University Archives; 3) structure and staffing pattern; 4) management of archival records; 5) transparency of transactions and access to information; (6) standards, inspection, reporting, and audit; 7) administration of University Archives; 8) miscellaneous provisions; 9) permanent buildings and; 10) amendments to implementing rules and regulations. A researcher-rated checklist was devised based on the Republic Act (RA) 9470 and was put into the context of a university archives. Moreover, document scanning was used to provide proof or pieces of evidence on the real status of the archives in the university library. Findings revealed that the University Archives showed compliance to most of the provisions of RA 9470 except for a few that needed stronger emphasis on the importance of compliance to standards. Archives continue to play its role in the academic and research community and that the archivists and librarian in-charge must innovate ways to be more relevant in the millennium age and even in a pandemic crisis like

Article/Journal Title: Archiving system for College of Industrial Technology Student's Researchers

Web Page Title: Archiving system for College of Industrial Technology Student's Researchers

Author and Date: Soriano I. L., Dragon J. M. S., Chessa L., Efe Shaireyl N., Ditapat Jay Encio. (2021)

URL:

<https://www.coursehero.com/file/139787195/TR1-RESEARCH-CHAPTER-1-3-Rev-07docx/>

Summary:

Archiving systems allows an organization or institution to easily conduct initial search and review of the archive for data that is responsive to the request (Schuler, 2011). It included the ability to keep undergraduate and graduate thesis and retain them for as long as they are needed. It is aimed at replacing the existing manual format for storing documents in the education system. The electronic form of archiving will allow researchers to archive work done in previous years without requiring physical space. Admin and students may re-use documents from previous years and minor editing may be required to keep the documents current for current processes. To keep documents, physical files are used. The manual process takes up physical space and the data cannot be kept current to save time. Therefore, Admin and students of CIT student's researcher has to compile documents in order to keep up with time. There is no editing allowed to save time. The CIT archiving system is to bring about enhancements. An archival system refers to the management of records that are of continuing benefit to the institution that holds them under the control of archival institutions, i.e., a place for preserving public records and historical documents. This, formative view of archival systems focuses on the processes needed to ensure that records are accessible and that their meaning is available over time.

Article/Journal Title: The Readiness of a State College for the Establishment of a Digital Library. Digital Commons.

Web Page Title: The Readiness of a State College for the Establishment of a Digital Library. Digital Commons.

Author and Date: Alicmas, V. W., & Ramos, B. V. (2015)

URL: <https://digitalcommons.unl.edu/cgi/viewcontent.cgi?article=3772&context=libphilprac>

Summary:

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

The study looked into the readiness of a state college for the establishment of a digital library. In particular, it assessed the knowledge of the respondents about digital library and its uses, digitization process, and electronic resources services. It also evaluated the extent of adequacy and availability of physical resources, adequacy of professional librarians and qualities of library staff, financial resources, library collections, information technology resources and the prospects for a digital library. The study applied the descriptive-evaluative method of research. Three hundred fifty-three (353) students and ninety-seven (97) faculty and employees from both campuses comprised the four hundred fifty (450) respondents. The questionnaire was the main data gathering tool. Frequency counts, percentages, and mean ratings (with descriptive equivalent) were used as descriptive statistics.

Based on the set measure of readiness, generally, the state college is not ready for the establishment of a digital library. However, the respondents are moderately knowledgeable on the aspects of digital library while the physical resources, number of professional librarian, qualities expected to the library staff, financial resources, library collection and information technology resources were evaluated as adequate. As to the prospects for a digital library, 98.22% of respondents favored the establishment of a digital library in the state college libraries as part of additional access to information.

URL:

<https://typeset.io/papers/proposed-finding-aid-for-hukbalahap-guerrilla-unit-files-of-2lodd9t5mv>

Summary:

This paper focuses on the development of a proposed finding aid for the digitized Philippine Archives Collection of the Philippine Veterans Affairs Office (PVAO). The original records are in the state of deterioration and are currently housed at the US National Archives and Records Administration in College Park, Maryland. The retrieved records of Guerrilla Unit Recognition Files (1941 – 1948) consist of 271 Legal Archives Boxes. For the short duration of the project, the author concentrated on one specific group of guerillas which is the Hukbalahap, an acronym for Hukbong Bayan Laban sa Hapon (People's Anti-Japanese Army). This record group is important and can be used to supplement the gaps in the WWII history, and the war activities and bravery of Filipino soldiers and civilians during this period. The collection is composed of textual records in various formats such as rosters, military reports and correspondence. The finding aid is based on the principles of archival arrangement and description, and the General International Standard Archival Description ISAD(G), Second Edition, 2000.

Article/Journal Title: Electronic Document Archival System of STO. Niño National High School

Web Page Title: Electronic Document Archival System of STO. Niño National High School

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

URL:

<https://ijsmr.in/vol-5-issue-6/electronic-document-archival-system-of-sto-nino-national-high-school/>

Summary:

Despite the snags and challenges of the manual operations, some of the public high schools in the Philippines, particularly those in the provinces, still do not use computerized systems for the development of the system itself is costly. One of the operations of the schools is the manual archiving of 201 files that contain employees' personal information and profile. As the files are hard-copy documents filed in cabinets and folders, there were incidents of loss of files, duplicate data- entry, unsecured storage, and difficulty of retrieval and updating records. Oftentimes, these records are needed to be reproduced and updated for promotion and accreditation. This study, Electronic Document Archiving System (EDAS) was conducted to design, implement, and transform the manual keeping of records into a computerized system for the public high school. Using the Waterfall Model of system development, the system utilized the data gathered to identify the needs and solutions in transforming and upgrading the existing manual system. The development of the system resulted in a well- organized, uniform, and easy-to-search records. Specifically, the electronic archiving system developed store records (documents) into a safer and secured database that can be retrieved easily and free from any damage. However, it should also be emphasized that the most efficient way to have a good process in keeping the records is to have organized manual operations aside from a computerized archiving system to automate it.

Article/Journal Title: iKnow Research Archive: A Website that Serves as an Existing Body of Knowledge for Future Researchers

Web Page Title: iKnow Research Archive: A Website that Serves as an Existing Body of Knowledge for Future Researchers

Author and Date: Lorenzo, Maria Greciel Margareth C. (2022)

URL: <https://rb.gy/yyw93>

Summary:

The importance of research in the higher curriculum remains unquestionable as it is a vehicle that allows students to develop their critical thinking skills, gain communication skills, and instill the value of retrieving and synthesizing information. With more and more students conducting their studies, the line between what has been done before in a certain field of specialization and what has already been written about is slowly blurring. This is why the researcher wanted to create an archive that would serve as a repository of past works and future works to help aid this dilemma. The website is called "iKnow Research Archive" and it serves as an existing body of knowledge for future researchers. The website was built using the website

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

builder, Wix, that provided for the website's domain hosting. To determine the functionality of the website, the researcher conducted a survey among twenty (20) respondents from Grade 11 A.Y. 2020-2021. Results show that the website worked with no errors on both computer and mobile devices. The website was also capable of functions such as: locating, viewing, and downloading of content.

Article/Journal Title: The Philippine Performance Archive on Cultural Performances: Archive as Performative Cultural Memory and Pedagogy. In Digital culture and humanities

Web Page Title: The Philippine Performance Archive on Cultural Performances: Archive as Performative Cultural Memory and Pedagogy. In Digital culture and humanities

Author and Date: Tiatco, A. P., Viray, B. L., & Javier, J. R. (2019)

URL: https://doi.org/10.1007/978-981-13-1277-9_3

Summary:

The essay is a general overview of the Philippine Performance Archive on Cultural Performances. The first part is an introduction and a presentation of the archival project with emphasis on the concept of cultural performance, concretized within performance studies paradigm using Philippine society and culture as context. The second part is a discussion of how data in the archive were documented and collected using focused ethnography as primary methodology. The method is argued to be the distinguishing mark of the project from other digital archives. Also, this section provides a detailed exposition about the significance of understanding local performance vocabularies and how these terms are translated into the archive through semantic framing. In the end, it is asserted that the Philippine Performance Archive on Cultural Performances functions not only as a repository of resource materials on the study of Philippine cultural performances but also as a performative cultural memory and a pedagogical tool.

Article/Journal Title: Spanish Origins of the National Archives of the Philippines

Web Page Title: Spanish Origins of the National Archives of the Philippines

Author and Date: Jon E. Royeca (2022)

URL: <https://rb.gy/yyw93>

Summary:

The National Archives of the Philippines (NAP) was officially established by the American colonial authorities on 21 October 1901, but its origins are rooted in the Spanish rule of the

PAMANTASAN NG LUNGSOD NG VALENZUELA

Tongco Street, Maysan, Valenzuela City

country (1565-1898). Today, it holds about 60 million pieces of records, more than 18.8 million of which were produced during the said rule (NAP, Memorandum No. 121528). Using government reports, contemporary accounts, and NAP's collections, this paper explains the beginnings of NAP, how those 18 million pieces of Spanish records were created and preserved for centuries, and what the contents and intents of those records are. It also cites through those records the important role that the Spanish rulers had in the formation of the Filipino nation, like the establishment of villages, towns, and provinces; the construction of roads, bridges, ports, and public buildings; and the maintenance of public safety and health.
